

1    **WHAT IS CLAIMED IS:**

- 2            1. A collapsible barbecue grill assembly comprising:  
3                a top rack (20) composed of two side frames (22a) (22b) and two  
4                panels (24a) (24b) pivotally and connecting between the two side frames  
5                (22a) (22b), wherein each side frame is a U-shaped frame and has a top and  
6                two arms and one of the panels has a curved collar (242) to surround more  
7                than half of a circumference of a corresponding one of the arms of the side  
8                frame to which the panel is attached to pivotally mount the panel (24) on the  
9                arm;  
10              a leg assembly (10) attached to the top rack (20) to support the top  
11             rack (20) and having four legs to respectively and detachably engage with  
12             the two arms of <sup>the</sup> two side frames (22a) (22b); and  
13              a foldable charcoal container (30) mounted on the top rack (20)  
14             composed of two symmetrical bodies (32) pivotally connected with each  
15             other to construct an enclosing wall with a bottom opening and a top opening,  
16             and a bottom plate (32) attached to the enclosing wall to cover the bottom  
17             opening.  
18              2. The collapsible barbecue grill assembly as claimed in claim 1,  
19             wherein each symmetrical body (32) of the charcoal container (30) has a  
20             long side board (322) with two long sides and two short sides, and two wings  
21             (324) are respectively and pivotally attached to the two short sides of the  
22             long side board (322); and  
23              each wing (324) on one of the symmetrical bodies (32) has a distal  
24             end pivotally connected to an adjacent distal end of a corresponding one of
